

Lesson 1

Introduction to React Native

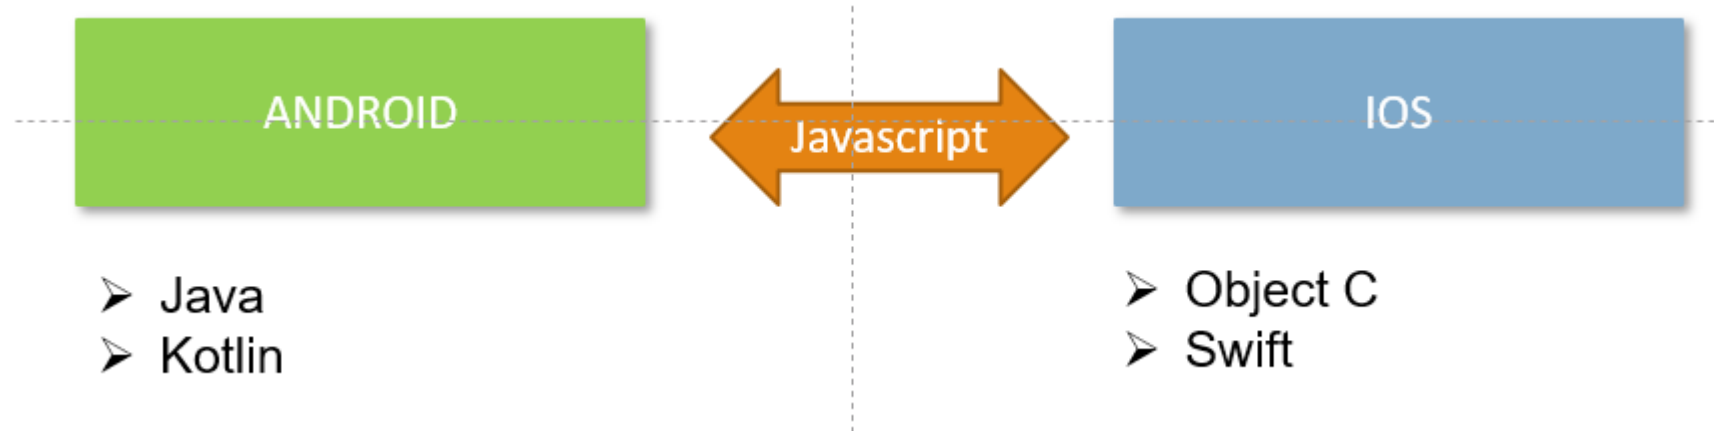

1

INTRODUCTION TO REACT NATIVE

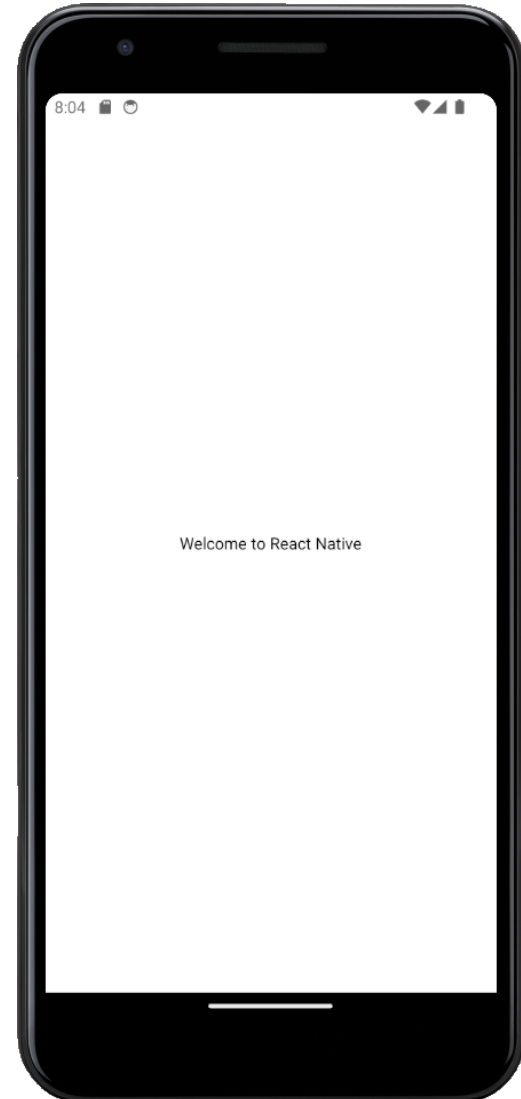

- Is a JavaScript framework
- Using for developing a real, native mobile application for iOS and Android

React Native Code

```
import { StatusBar } from 'expo-status-bar';
import { StyleSheet, Text, View } from 'react-native';

export default function App() {
  return (
    <View style={{ flex: 1, backgroundColor: '#fff',
      alignItems: 'center', justifyContent: 'center',
    }}>
      <Text>Welcome to React Native</Text>
      <StatusBar style="auto" />
    </View>
  );
}
```

2

BENEFITS OF REACT NATIVE

- Uses JavaScript - Use the existing JavaScript knowledge to build native mobile apps
- Uses React - Use all the principles learned in React with React Native
- Builds Cross-Platform Native Apps - React Native supports IOS and Android platform
- Cost Effective

Community

- Facebook Supported, Community Driven – Facebook released React Native in 2015 and has been maintaining it ever since
- React Native used it in many apps:
 - Facebook
 - Discord
 - Instagram
 - Skype

Developer Experience

- Fast Refresh - See your changes as soon as you save
- Easy Debugging - Debugging JavaScript code

3

WHAT IS EXPO?

- Is an open-source platform for making universal native apps for Android, iOS, and the web with JavaScript and React
- Is ecosystem of tools that develop and deploy your app
 - Expo CLI
 - Expo SDK
 - Expo Client

Create Expo App

- Install **Node.js LTS**
- Create a new app

npx create-expo-app <app-name> --template blank

Start Server

```
- npx expo start
```

Starting Metro Bundler

```
> Metro waiting on exp://192.168.1.4:8081
> Scan the QR code above with Expo Go (Android) or the Camera app (iOS)

> Using Expo Go
> Press s | switch to development build

> Press a | open Android
> Press w | open web

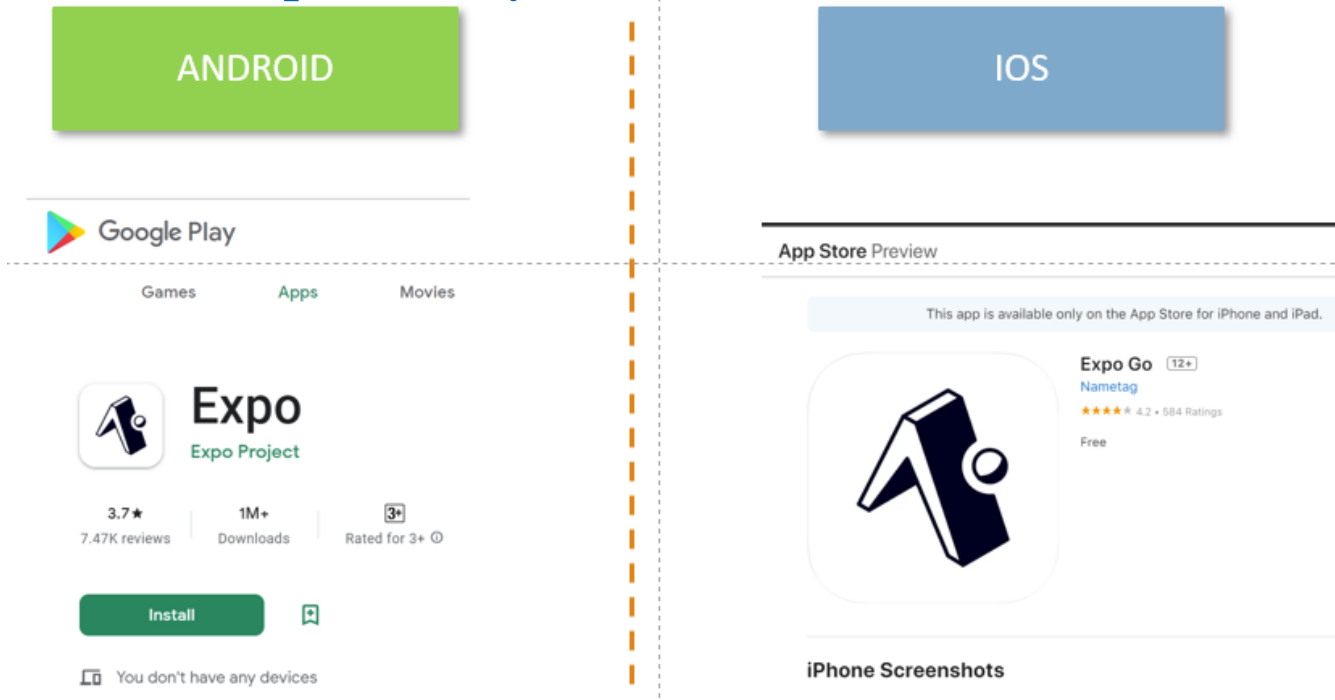

> Press j | open debugger
> Press r | reload app
```

Running Your App

- Open the app on your device that has **Expo Go**
- Running your app on a **simulator or virtual device**

Using Expo Go

- Is a free, open-source sandbox for learning and experimenting with React Native on Android and iOS devices
- Install Expo Go on your device

Using Android Emulator
