

BÀI TẬP THỰC HÀNH

PHÁT TRIỂN ỨNG DỤNG THIẾT BỊ DI ĐỘNG

11. Image Picker – Upload file

Bài tập 1. Image Picker

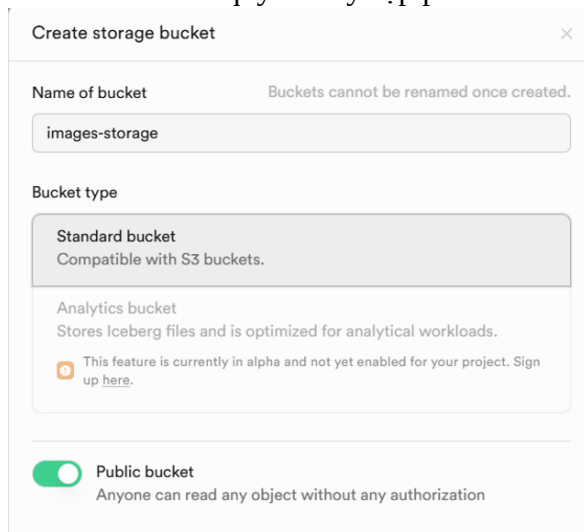

Bước 1. Tạo project & supabase storage

The image shows the Supabase project creation form. It includes fields for 'Project name' (set to 'Demo01'), 'Database Password' (masked with dots, with a 'Copy' button and a note about percent-encoding), and 'Region' (set to 'Southeast Asia (Singapore)'). A note at the bottom says 'Select the region closest to your users for the best performance.'

Bước 2. Tạo supabase storage

- Mở quyền truy cập public

The image shows the 'Create storage bucket' form. It includes a 'Name of bucket' field (set to 'images-storage'), a 'Bucket type' section with 'Standard bucket' selected, and a 'Public bucket' toggle which is turned on. A note at the bottom says 'Anyone can read any object without any authorization'.

Bước 3. Cài đặt quyền truy cập storage

```
create policy 'my policy'
on storage.objects
for insert
to public
with check (bucket_id='images-storage')
```

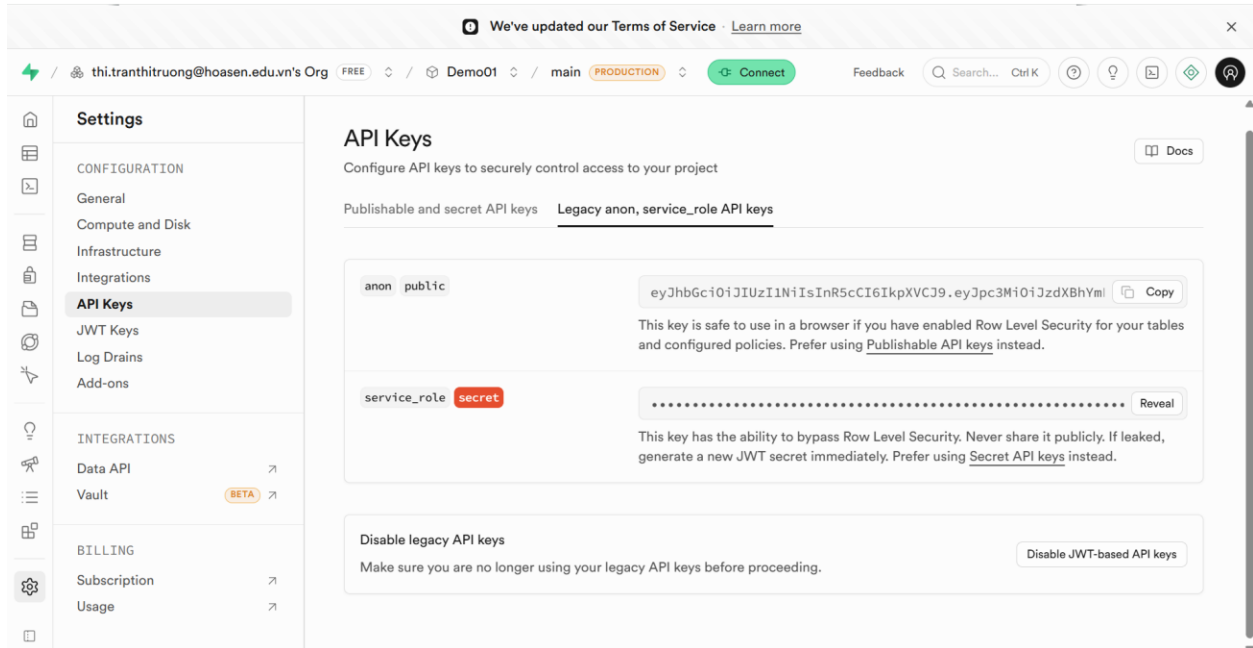

Bước 4. Mở project ImagePickerDemo

Bước 5. Cài đặt thư viện

- npm install expo-image-picker
- npm install expo-secure-store
- npm install expo-file-system
- npm install @supabase/supabase-js

- Vào Project setting của supabase copy các thông tin của url và key

Ví dụ:

```
import { createClient } from '@supabase/supabase-js'
const supabaseUrl = 'https://jfkdaidsybxhqcnbpqgo.supabase.co'
const supabaseKey = process.env.SUPABASE_KEY // thay anon API public key
const supabase = createClient(supabaseUrl, supabaseKey)
```

```
import React, { Component, useState, useEffect } from "react";
import { Dimensions, StatusBar, Touchable, Pressable, Alert } from "react-native";
import { StyleSheet, View, Text, TouchableOpacity, TextInput, Image, TouchableWithoutFeedback, Keyboard } from "react-native";
import * as SecureStore from 'expo-secure-store';
import * as ImagePicker from "expo-image-picker";
import MaterialCommunityIcons from '@expo/vector-icons/MaterialCommunityIcons'

import { File } from 'expo-file-system';
//import * as FileSystem from 'expo-file-system'

import { createClient } from '@supabase/supabase-js'

const supabaseUrl = 'https://jbbabuvmqhwuroqgrfpy.supabase.co'
const supabaseKey =
'eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpc3MiOiJzdXBhYmFzZSIsInJlZiI6ImpiYWJ1dm1xaHd1cm9xZ3JmcHp5Iiwicm9sZSI6ImFub24iLCJpYXQiOiJlZ3NkxOTg1MDMsImV4cCI6MjA5NDc3NDUwM30.0SRjpUcOL3Ihs7V9JyE4GxsLYmgr8Zm9hP-plaY_xt8'
const supabase = createClient(supabaseUrl, supabaseKey)

const ImagePickerProfile = () =>
{
```

```

    const [selectedImage, setSelectedImage] = useState({
      localUri:
"https://jbbabuvmqhwuroqgrfpzy.supabase.co/storage/v1/object/public/images-
storage/cat.jpg"
    });

    const [isEditable, setEditable] = useState(false)
    const [fullName, setFullname] = useState("Hoang Hai An");
    const [email, setEmail] = useState("an.hoanghai@gmail.com");
    const [address, setAddress] = useState("");
    const [phone, setPhone] = useState("0841234567");
